

26

In the second pass Owen noted AA bursts at Katena at 11,000 feet and other bursts at 6000 feet at the cloud top. The fire came from the north side of the field and was directed through ~~the~~ scattered clouds. Small weapons fire was also seen. Owen said ~~that~~ it was barrage type fire. ^{The Marine} Rockets were fired at the runway, the planes were strafed again and other installations damaged. ^{ON THE TUG} ~~XXXXXX~~ ~~one~~ ~~pass~~ and more damage resulted? one-quarter mile Murray saw shipping off the west shore ~~XXXXXX~~. A tug was towing three Sugar Dogs and the Corsairs gave them a thorough pasting with bullets and rockets. The tug was left in ~~XXXXXX~~ 30-foot high flames and probably sank, while two other luggers were sunk. Another lugger nearby was damaged and grounded while three others were damaged. Returning from the shipping attacks, the Corsairs raced across the island and concentrated on Ichi Banare island about 8000 yards off the east coast. Strafing attacks set the town of about 50 houses afire. As ~~xxxx~~ he ~~xxxxx~~ roared across the island at practically tree top level Huntington could see two Japs dashing for cover around the corner of the house - while Sankey could an excellent look at a Jap shrine. And a lot of Japs got a good look at the droves of white-starred American planes - aircraft which no smooth-talking Tokyo comentator can ever convince him were " ~~xxx~~ ^{Jap own} own. "
