* Quality for Commandant's War Bond Percent.

The War Bond Front

For the Navy Yard to rewin the Secretary's War Bond Honor Flag, and a Shop or Office the Commandant's War Bond Pennant, actual deductions must exceed the '90-10' standard for two consecutive months. As our new and increased pledges take effect, watch the monthly figures grow. Keep those increases coming!

↓ ↓
 Congratulations to the employees of the Foundry, X42-85, on qualifying for the Commandant's War Bond Pennant! Who will be next?

↓ ↓
 The Paint Shop, X71, is the only shop to attain the distinction of having 100% participation on the Payroll Plan. J. A. Romney, the Master, is also Division Chairman of the Shop War Bond organization.

↓ ↓
 The combined effort of the three supply groups—Supply Clerical, Supply Labor, and Supply Storehouse—was one of the outstanding achievements of the recent Payroll Savings Campaign.

↓ ↓
 Lieut. Dave Purter, from the Executive Office of the Secretary of Navy, visited the Yard February 18 to obtain information about our recent bond campaign. This will appear in a forthcoming issue of "Fighting Dollars"—a publication distributed by the Secretary's Office.

↓ ↓
 Ordnance Machine X16, got off to a late start, but certainly finished strong. In the last few days of the drive they jumped from 8.3% of pay to 11.1%. Special congratulations go to J. C. Fonger, Master, and to P. J. Sidnam, Division Chairman, on such a whirlwind finish.

↓ ↓
 At the close of the Payroll Campaign, 97.4% of the Shipfitter Shop had signed up for War Bonds on the Payroll Plan. This is a real achievement for a Shop of this tremendous size. It wouldn't take much of an additional increase in pledges by those already participating to go over the 10% mark and win the Commandant's Pennant.

↓ ↓
 The Electric Shop, X51, gave an excellent account of itself. 96.2% are now on the Payroll Plan for 11.3% of the Shop's total payroll.
