

Rescue Off Iwo Jima

1—These spectacular photos are from official U. S. films made from a warship off Iwo Jima. Upside-down Navy plane starts crash dive.

2—Plane, still upside down, hits water nose first. Carrier-based, it was one of many supporting Marines in their invasion of the Japanese island.

3—The plane has sunk but pilot bobs to surface. His life preserver is clearly visible as he strikes out for destroyer, not shown.

4—Having made the destroyer safely, pilot is transferred to his carrier via breeches buoy. Waters churn beneath him but he'll fight another day.
