4. SHIP'S SIDES - All hands are to be complimented on the fine start in painting the ship during this stay in port. The 5th Division in particular was outstanding.

5. ATTENTION - A large part of the ship's side is now painted. All hands take particular care to take all trash and excess dunnage to the fantail before throwing it over. Don't foul a good paint job by throwing trash over amidships.

6. PAINT - In connection with the program for painting the ship, large quantities of paint have been loaded aboard. Quantities of this paint are stowed about the ship so as to be readily accessible. All hands are advised that such paint is in store and will be issued only under the direction of the Hull or Supply Departments.
